

Germán David Alvarez

Senior Product Designer

PROFESSIONAL SUMMARY

Senior Product Designer who turns ambiguous business and data problems into research-informed, scalable B2B SaaS workflows. I work from discovery and interaction design through design systems, analytics, and code-based prototypes—connecting business decisions, complex data, and practical experiences that teams can ship.

PROFESSIONAL EXPERIENCE

8020REI Jun 2024 – Present

Senior Product Designer

Remote · PropTech SaaS · B2B · U.S.-based

Lead end-to-end product design for a B2B PropTech SaaS used by U.S. real estate investors. My work covers strategy, discovery, UX research, interaction design, design systems, and full-stack implementation. I partner with Product, Engineering, Customer Success, and leadership, using AI to make design and delivery faster.

- > Led redesigns of core data and configuration interfaces, delivering **up to 50% higher active usage (DAU)**, **roughly 80% fewer reported bugs and issues**, and **70%+ in-product CSAT**
- > Built a 0→1 analytics platform that brought together 6 internal data sources for non-technical teams. **It uncovered a provider-status conflict that had been quietly blocking client mailings; resolving it restored mail volume and recovered revenue.** A client-requested API built on the platform reached 3× adoption (Next.js, TypeScript, Fastify, BigQuery)
- > Built and scaled production design systems, coding components alongside frontend engineers and helping cross-functional teams use shared libraries across products

Habi Aug 2022 – Jun 2024

Product Designer · Aug 2023 – Jun 2024

Creative Designer · Aug 2022 – Aug 2023

Hybrid · Bogotá, Colombia · PropTech

Joined as a Creative Designer, contributing to product work across acquisition, internal operations, customer service, and research. Transitioned into a formal Product Designer role in August 2023, owning discovery, interaction design, prototyping, and iteration with Product, Engineering, and Growth.

- > Improved the mobile acquisition funnel through behavioral analytics, progressive disclosure, and A/B testing, increasing **qualified lead conversion by 30%**
- > Designed an operations platform for commercial and zone leaders managing teams and territories in multiple cities, replacing spreadsheet-heavy workflows
- > Conducted UX research, created AI-supported customer service prompts, and contributed to brand systems and multi-channel marketing campaigns

Metro de Bogotá 2018 – 2022

Creative Designer

On-site · Bogotá, Colombia · Public Infrastructure

Led visual design and internal communications for a major Colombian public infrastructure project. Work included advertising campaigns, intranet design, editorial newsletters, and event materials.

CORE COMPETENCIES

- Product Design
- Product Strategy
- UX Research
- Interaction Design
- UI Design
- Design Systems
- 0→1 Product Design
- Prototyping
- Usability Testing
- Data Visualization
- B2B SaaS
- PropTech
- Code-based Prototyping
- AI-assisted Workflows

TOOLS & TECHNOLOGIES

DESIGN

- Figma
- Figma Make
- Pencil
- Adobe Suite

DEVELOPMENT

- React
- Next.js
- Vue
- Nuxt
- TypeScript
- Tailwind CSS
- Fastify
- FastAPI
- Git / GitHub
- GitHub Actions

DATA & CLOUD

- BigQuery
- AWS Aurora
- Firebase
- Google Cloud Run

ANALYTICS & RESEARCH

- Google Analytics
