Bogotá, Colombia · Open to remote

PROFESSIONAL SUMMARY

Lead Product Designer and Design Engineer with 7+ years building complex B2B SaaS and PropTech products. Owns end-to-end execution: UX research and strategy, interaction design, design systems, and production-grade implementation in React/Next.js and Vue/Nuxt. Acts as a business stakeholder beyond design — leading 0→1 product work on new verticals, shipping production code, and partnering with executive leadership. Drives measurable outcomes through data-validated decisions and AI-augmented workflows.

PROFESSIONAL EXPERIENCE

8020REI

Jun 2024 – Present

Lead Product Designer & Design Engineer

Remote · PropTech SaaS · B2B · U.S.-based

- Own product design strategy, discovery, and end-to-end execution across all platform initiatives — partnering with Product, Engineering, Customer Success, and executive leadership
- Designed and shipped **Metrics Hub** from zero to production with AI-augmented workflows (Claude Code, multi-source LLM verification): unified analytics across 6 data sources, **recovered blocked revenue through automated alert detection**, tripled Properties API adoption, zero additional software spend. Built end-to-end in Next.js, TypeScript, Tailwind, Fastify, BigQuery, AWS Aurora
- Co-led **0→1 design and build of 8020 ROOF**, a multi-tenant B2B SaaS turning a 100M+ row property database into a self-serve roofing marketing pipeline — three-person team, ~1.5 months active build using AI as a teammate. **2 pilot clients live in production (one at 100% satisfaction)**, retiring Excel-based monthly list delivery. Built in Nuxt 4, Vue 3, TypeScript, FastAPI, PostgreSQL (Aurora), Firebase, Cloud Run
- Led **Properties View redesign (50% platform usage increase, 70%+ CSAT, ~80% bug reduction)** and **BuyBox Editor redesign (80% fewer configuration errors, 50% fewer support tickets)** — both shipped on a Kairo design system migration
- Scaled the **Axis design system** into a production component library of 31 components with full dark mode and 45+ in-platform documentation pages; also develop and maintain the legacy Kairo system
- Led 0→1 design of **DM Campaign** (automated direct mail system) — adopted by 12 active clients, validating the platform's data-event automation pattern

CORE COMPETENCIES

- Product Design
- UX Strategy
- UX Research
- Interaction Design
- Design Systems
- B2B SaaS
- PropTech
- Data Visualization
- 0→1 Product Design
- Full-stack Development
- AI-augmented Workflows
- Cross-functional Leadership

OBS Business School

2020 – 2021

Bachelor in Industrial Design

Pontificia Universidad Javeriana

2011 – 2016

TuHabi (Habi)

Aug 2022 – Jun 2024

LANGUAGES

Product Designer · Creative Designer

Hybrid · Bogotá, Colombia · PropTech

- › Redesigned mobile-first acquisition funnel for Mexico: **30% increase in qualified lead conversion**, higher mobile completion rates, improved downstream lead quality for sales
- › Reduced registration flow from 11 to 7 screens using AI-assisted prefill, progressive disclosure, and A/B tested variants — validated through behavioral analytics
- › Designed internal operations platform for commercial and zone leaders managing teams and territories across cities, replacing spreadsheet-dependent workflows
- › Conducted UX research, built AI-driven customer service prompts, contributed to brand systems and multi-channel marketing campaigns

Spanish — Native

English — Full professional proficiency

Metro de Bogotá

Nov 2018 – Aug 2023

Creative Designer

On-site · Bogotá, Colombia · Public Infrastructure

- › Designed large-scale public communication campaigns for one of Colombia's flagship infrastructure projects
- › Built and maintained internal communication systems: intranet design, editorial newsletters, advertising campaigns, and event materials

Rd Studio

Jul 2014 – Nov 2014

Industrial Designer

Bogotá, Colombia

- › 3D modeling and product prototyping for industrial design projects

SELECTED IMPACT — SIGNATURE PROJECTS

Metrics Hub — Unified Internal Analytics Platform

8020REI · 2026 · Lead Designer & Full-Stack Builder

Built end-to-end with AI-augmented workflows (UX architecture → full-stack implementation → cloud deployment). Unified 6 heterogeneous data sources into a single operational dashboard for non-technical teams. 91 reusable widgets across 11 business domains. Axis design system with automated quality gates. Stack: Next.js, React, TypeScript, Tailwind, Fastify, BigQuery, AWS Aurora, Firebase, Google Cloud Run, GitHub Actions.

→ Blocked revenue recovered · 3x API adoption · Company-wide self-serve analytics at zero additional cost

8020 ROOF — Multi-Tenant Roofing Marketing SaaS (0→1)

8020REI · 2026 · Lead Product Designer & Builder

Multi-client SaaS turning a 100M+ row property database into ready-to-execute roofing marketing lists. Operators define buyboxes, search properties, and run a 5-stage fulfillment pipeline emitting direct-mail and cold-calling lists every month. Built end-to-end in Nuxt 4, Vue 3, TypeScript, FastAPI, PostgreSQL (Aurora), Firebase, and Cloud Run, with AI as a teammate across design, frontend, backend, and QA. Scaled Axis into 31 production components with 45+ in-platform documentation pages.

→ 2 pilot clients live, one at 100% satisfaction · Excel delivery retired in 6 weeks · ~20K direct-mail + ~115K cold-call records per cycle
