PROFESSIONAL SUMMARY

Senior Product Designer who turns ambiguous business and data problems into research-informed, scalable B2B SaaS workflows. I work across discovery, UX research, interaction design, design systems, analytics, and code-based prototyping to connect business decisions, complex data, and practical experiences that teams can ship.

CORE SKILLS

Product design: Product strategy, end-to-end product design, UX research, usability testing, interaction design, UI design, prototyping, information architecture, design systems

Product domains: B2B SaaS, PropTech, mobile-first acquisition, internal operations tools, data visualization, analytics platforms, 0-to-1 product design, AI-assisted workflows

Tools and technologies: Figma, Figma Make, Pencil, Adobe Creative Suite, Google Analytics, Heap, Hotjar, Clarity, React, Next.js, Vue, Nuxt, TypeScript, Tailwind CSS, Fastify, FastAPI, BigQuery, AWS Aurora, Firebase, Google Cloud Run, Git, GitHub

PROFESSIONAL EXPERIENCE

Senior Product Designer | 8020REI

Jun 2024 - Present | Remote | U.S.-based B2B PropTech SaaS

- Lead end-to-end product design for a B2B PropTech SaaS used by U.S. real estate investors, partnering with Product, Engineering, Customer Success, and leadership on strategy, discovery, research, interaction design, and delivery.
- Led redesigns of core data and configuration interfaces, delivering up to 50% higher daily active usage, roughly 80% fewer reported bugs and issues, and 70%+ in-product CSAT.
- Designed and built a 0-to-1 analytics platform that brought together six internal data sources for non-technical teams; it surfaced a provider-status conflict blocking client mailings, and resolving it restored mail volume and recovered revenue.
- Created and scaled production design systems, implementing components alongside frontend engineers and enabling shared libraries across products. A client-requested API on the analytics platform reached 3x adoption.

Product Designer | Habi

Aug 2023 - Jun 2024 | Hybrid | Bogota, Colombia | PropTech

- Owned discovery, interaction design, prototyping, and iteration with Product, Engineering, and Growth for acquisition, internal operations, and customer-service workflows.
- Improved a mobile-first acquisition funnel through behavioral analytics, progressive disclosure, and A/B testing, increasing qualified lead conversion by 30%.
- Designed an operations platform for commercial and zone leaders managing teams and territories in multiple cities, replacing spreadsheet-heavy workflows.

Creative Designer | Habi

Aug 2022 - Aug 2023 | Hybrid | Bogota, Colombia | PropTech

- Contributed product-design work across acquisition, internal operations, customer service, and research while supporting brand systems and multi-channel marketing campaigns.
- Conducted UX research with cross-functional teams and created AI-supported customer-service prompts to improve service workflows.

Creative Designer | Metro de Bogota

2018 - 2022 | On-site | Bogota, Colombia | Public Infrastructure

- Led visual design and internal communications for a major Colombian public infrastructure project, including website and intranet design, advertising campaigns, editorial newsletters, and event materials.

EDUCATION

Master's in Branding, Brand Strategy and Visual Communication | OBS Business School | 2020 - 2021

Bachelor in Industrial Design | Pontificia Universidad Javeriana | 2011 - 2016
